#1 Liner
Fan Brush
Clay Carbon
Sheet Protector or Tile for Glaze
Red Pencil
Regular Pencil
Ruler
Water Bowl
Paper Towels

Instructions

1. Wipe dust from properly fired cone 04 bisque.
2. With clay carbon, transfer the circle template to the center of the plate. Measure the center of the plate, 5", place the clay carbon, and then the pattern on top. Do your best to align the center of the plate and the center of the pattern to create an even 6" circle in the center.
3. Glaze the center of the circle with two coats of FN-001. Let it dry thoroughly.
4. With clay carbon, transfer the pattern.
5. Glaze "JIVE" with SC-74 doing your best to stay in the lines. For the best look, glaze three coats, allowing them to dry in between.
6. Using SC-15 and a liner brush, glaze the musical notes and lines. Take your time and be patient, detail work can be stressful.
7. Using SC-15 and a liner brush, outline "JIVE".
8. Glaze the outside of your circle, and the back of the plate with three coats of FN-9. Allow to dry between each coat.
9. Stilt ware and fire to cone 06.
10. Remove stilt marks.
